Louisiana Administrative Code 61:I.1907 requires certain information about the system be provided to determine eligibility for the credit. Below is a list of additional information required about the wind and/or solar system. Failure to provide this information may result in the disallowance of the credit.

1. A copy of the modeled array output report using the PV Watts Solar System Performance Calculator. The calculator was developed by the National Renewable Energy Laboratory and is available at the website [www.nrel.gov/rredc/pvwatts](http://www.nrel.gov/rredc/pvwatts). The analysis must be performed using the default PV Watts de-rate factor.
2. A copy of the solar site shading analysis conducted on the installation site using a recognized industry site assessment tool such as a Solar Pathfinder or Solmetric demonstrating the suitability of the site for installation of a solar energy system.
